

## 1962 T6 Karmann Hardtop Coupe

This is one of the 698 Karmann T6 Hardtop Coupes produced for 1962. All matching numbers. It was found in storage here in Long Beach, owned by a local resident since about 1980. It was disassembled for painting in 1984, painted by Lazlo's Sports Car Center, and never reassembled. The 30-year-old paint is still nearly perfect! The original color combination was black/red. The original 1600 Super engine has been built to 1925cc using our latest Delta cylinder heads 118hp/128lbft. The original trans with BBAB Speedster ratios has been fully rebuilt. All suspension is newly rebuilt and the chassis is freshly undercoated. New wiring harness, full leather, 12V electrical system, Becker Europa, and many more options. Fully sorted and concours ready. Includes a WR restoration warranty.

Follow the link below to a photo page of the entire build:
